

1. Supporting Conservation Projects

The Rottnest Island Management Plan (RIMP) 2020-24 guides the operation of the RIA and highlights priority projects. The Rottnest Foundation provides input to the RIA in its scoping and delivery of projects that align with our Vision. The RIA is responsible for managing on ground implementation of projects and the Rottnest Foundation participates through project advisory processes to ensure partner benefits are delivered.

We seek your support to progress our major projects including:

- Wadjemup Bidi Walk Trail
Enhancements to the 45km walk trail network that is an important environmental management tool to manage visitor impact on the fragile coastal environment, whilst providing a new recreational and interpretive experience.
- Wadjemup Aboriginal Burial Ground
Implement recommendations for the memorialisation of the Burial Ground in concert with the wider Wadjemup Project.
- Rottnest Island Settlement Greening & Woodland Management Plans
Rehabilitate native vegetation/habitat in and around visitor precincts and the terrestrial reserve.
- 'Containers for Change'
Donate the cash that's in your containers to the Rottnest Foundation - Scheme ID C 10267961
